Experience

B-Level Technician | Suntrup Kia *April 2025 – Present*

- Diagnose and repair mechanical and electrical issues across domestic, Asian, and European vehicles using Dealer Track, Update Promise, and OEM diagnostic data.
- Perform state-certified safety and emissions inspections.
- Maintain high productivity in a flat-rate environment, completing 40-45 billed hours weekly while managing 6-10 vehicles per day.
- Train and mentor junior technicians, improving team efficiency and supporting knowledge development in diagnostics and repair procedures.
- Document detailed diagnostic findings and repair processes in service reports, ensuring clear communication and traceability of work performed.

Automotive Technician | Dobbs Tire and Automotive *September 2015 – April 2025*

- Diagnosed and repaired mechanical and electrical issues using tools, including Autel and Snap-On scan systems and OEM diagnostic data.
- Performed state-certified safety and emissions inspections and maintained high productivity in a flat-rate environment.
- Mentored junior technicians and documented detailed diagnostic findings to ensure clear communication and work traceability.

Claims Adjuster | American Auto Shield *August 2024 – June 2025*

- Managed ~20 daily inbound claims, evaluating repair requests, and approving coverage based on contract terms.
- Analyzed mechanical failures alongside warranty contracts to make accurate, consistent claim decisions in a high-volume environment.
- Developed and deployed an internal web-based tool ("Adjuster Assistant") using HTML, CSS, and Java to streamline documentation and improve accuracy.
- Utilized Salesforce, Microsoft Office, and Cisco Webex to manage workflows and communicate across teams.

IT Consultant | Bourbon Café and Coffee Saloon *April 2023 – Present (As Needed)*

- Provide ongoing IT support, maintaining network reliability and system functionality for a small business.

- Configure and deploy routers and Wi-Fi networks to support business operations and connected devices.
 - Diagnose and resolve network, hardware, and connectivity issues to minimize downtime.
